

RGF (Front End)

Tanvir

1. Front end Areas of practice have successfully retrieved the data but when I click on the read more button a new page open but there are no details are coming from the back end.
annulment have successfully retrieved the data but other single pages can't. if I create a new single page from the backend then also the same problem continues.
2. This are dummy data they are not matching with the areas of practices in the navbar.

3. On the footer there are services section but the service has no link and also, they are not matching with the areas of practice.

Tab

1. On tab view the contact page email cards email logo change its color and style

Back End (Profile)

1. When I change my profile the new profile image will be updated successfully but without a hard refresh the image will not showing in the profile image section. Only refresh will not be working.
